IN THE SPECIFICATION

Please amend the specification as follows:

Paragraph 0055:

The contents usage programs are software programs for using ~~edntents~~ contents provided by the server SV, and are comprised of a main program MP for performing overall processing relating to the use of contents, and reproducing programs (plug-in modules) PL1, PL2, . . . called "plug-ins" exclusively for various media information. The main program MP has a sequencer function of simply giving instructions for reproduction of various media information (contents elements) D1, D2, . . . included in each contents package PKa, and also has a function of managing various plug-in modules PL1, PL2, ...
